

SMOKE-FREE ADDENDUM

Date: _____

To: _____

Re: _____

City _____ State _____ Zip _____

Due to the increased possibility of smoke related damage to the property, beyond normal wear and tear due to smoking, and the increased risk of fire, **smoking is prohibited in and around any area of the home or apartment** located at the above address. This “no smoking” policy applies to all residents and guests.

For clarity of this agreement, the term **No Smoking** means not inhaling, exhaling, burning, nor carrying any lighted cigar, cigarette or other tobacco product (or any other “lighted” item or substance) in any manner or in any form.

Resident acknowledges that this no smoking policy and Smoke Free Addendum is made part of the lease or month-to-month agreement and agrees that he or she will not smoke in any room or area of the property, nor around the outer perimeter of the premises. In addition, Resident further understands that he or she will be responsible for enforcing this policy with all relatives and guests who visit the premises. If Resident fails to abide by this policy, he or she understands that Resident’s tenancy may be subject to immediate termination.

Receipt of Copy Acknowledged: Residents hereby acknowledge that they have read and understand that this addendum is incorporated into and made part of the lease. Residents understand it, agree to it, and have been given a copy.

Garbage Disposer Addendum

This agreement is an addendum and part of the Rental Agreement dated _____,
between Landlord/Management and Resident with reference to the property located at:

Disposers are a part of the plumbing system for a kitchen. The purpose of a disposer is to grind small amounts of food into small pieces that will easily pass thru the pipes from the kitchen to the main pipes leading to the sewer system.

Even with the best disposer (sometimes called a grinder by plumbers) large enough quantities of some food and scraps will cause the pipes beyond the grinder to become clogged.

Avoid putting the following foods thru a disposer:

- Bones (chicken, pork, lamb or beef)
- Vegetable peels (potato, cucumber, etc.)
- Fruit peels (lemon, orange ...) or pits or seeds (peaches, plums...)
- Coffee Grounds or Egg Shells
- Rice
- Beans
- Pasta
- Fibrous stringy vegetables (celery, kale, onion...)
- Grease or any liquid that will solidify at the temperature of cold tap water
- Best to avoid putting excess food items of ANY substance

I/we have read the above and understand, any expense for plumbing problems, clogs or replacement of disposal resulting from excess food (or any other items for that matter) put in the disposer will be paid for by the resident.
